

## **ADVANTAGES**

- Allows monitoring of multiple dust collectors at different facilities
- Reducing downtimes
- Secure data transmission
- Enables predictive maintenance
- Remote monitoring of filter condition

Installation Options	Camfil 's GoldLink sensor can be installed in all Gold Series dry dust collectors.
Comment	<ul> <li>Monitoring: daily average readings of main filter cartridge DeltaP condition &amp; installed optional secondary filter stage DeltaP condition</li> <li>Simple installation: installs easily onto any new or existing dust collector, simply connect differential pressure tubes and apply power</li> <li>Data security: all data sent through the global LTE &amp; 3G network is fully encrypted end to end</li> <li>Network isolation: provides a fully isolated cloud connection without going through plant networks</li> <li>Enclosure IP66 rating: with external antenna for enclosure in harsh</li> </ul>
